I am a Ph.D. student in the [RISELab \(former AMPLab\)](#), [BDD](#) and [Math Department](#) at University of California at Berkeley. I am advised by [Michael Mahoney](#). My research interest lies in computing statistics, optimization and machine learning. Currently, I am interested in leveraging tools from randomized linear algebra to provide efficient and scalable solutions for large-scale optimization and learning problems. I am also working on the theory and application of deep learning.

## Education

- **University of California at Berkeley** **CA, USA**  
*Ph.D. in Applied Mathematics, Department of Mathematics* *Sep. 2016–Present*
- **Shanghai Jiao Tong University** **Shanghai China**  
*B.S. in Applied Mathematics, Zhiyuan Honor College* *Sep. 2012–Jun. 2016*

## Publications

- **Q-BERT: Hessian Based Ultra Low Precision Quantization of BERT**  
*S. Shen, Z. Dong, J. Ye, L. Ma, Z. Yao, A. Gholami, M. W. Mahoney, K. Keutzer*  
arxiv preprint [1909.05840](#)  
Proc. AAAI 2020.
- **ANODEV2: A Coupled Neural ODE Evolution Framework**  
*T. Zhang\*, Z. Yao\*, A. Gholami\*, K. Keutzer, J. Gonzalez, G. Biro, and M. W. Mahoney*  
arxiv preprint [1906.04596](#)  
Proc. NeurIPS 2019
- **Residual Networks as Nonlinear Systems: Stability Analysis using Linearization**  
*K. Rothauge, Z. Yao, Z. Hu, and M. W. Mahoney*  
arxiv preprint [1905.13386](#)
- **HAWQ: Hessian AWARE Quantization of Neural Networks with Mixed-Precision**  
*Z. Dong\*, Z. Yao\*, A. Gholami\*, M. W. Mahoney, K. Keutzer*  
arxiv preprint [1905.03696](#)  
Proc. ICCV 2019
- **Inefficiency of K-FAC for Large Batch Size Training**  
*L. Ma, G. Montague, J. Ye, Z. Yao, A. Gholami, K. Keutzer, M. W. Mahoney*  
arxiv preprint [1903.06237](#)  
Proc. AAAI 2020.

## **Shallow Learning for Fluid Flow Reconstruction with Limited Sensors and Limited**

### **Data**

*N. B. Erichson, L. Mathelin, Z. Yao, S. L. Brunton, M. W. Mahoney, J. N. Kutz*  
arxiv preprint [1902.07358](#)

## **JumpReLU: A Retrofit Defense Strategy for Adversarial Attacks**

- *N. B. Erichson\*, Z. Yao\*, M. W. Mahoney*  
arxiv preprint [1904.03750](#)

## **Trust Region Based Adversarial Attack on Neural Networks**

- *Z. Yao, A. Gholami, P. Xu, K. Keutzer, M. W. Mahoney*  
arxiv preprint [1812.06371](#)  
Proc. CVPR 2019

## **Parameter Re-Initialization through Cyclical Batch Scheduling**

- *N. Mu\*, Z. Yao\*, A. Gholami, K. Keutzer, M. W. Mahoney*  
arxiv preprint [1812.01216](#)  
Proc. MLSYS Workshop at NeurIPS 2018

## **On the Computational Inefficiency of Large Batch Sizes for Stochastic Gradient Descent**

- *N. Golmant, N. Vemuri, Z. Yao, V. Feinberg, A. Gholami, K. Rothauge, M. W. Mahoney, J. Gonzalez*  
arxiv preprint [1811.12941](#)

## **Large batch size training of neural networks with adversarial training and second-order information**

- *Z. Yao\*, A. Gholami\*, K. Keutzer, M. W. Mahoney*  
arxiv preprint [1810.01021](#)

## **Hessian-based Analysis of Large Batch Training and Robustness to Adversaries**

- *Z. Yao\*, A. Gholami\*, Q. Lei, K. Keutzer, M. W. Mahoney*  
arxiv preprint [1802.08241](#)  
Proc. NeurIPS 2018

## **Inexact non-convex Newton-type methods**

- *Z. Yao, P. Xu, F. Roosta-Khorasani, M. W. Mahoney*  
arxiv preprint [1802.06925](#)

## **A hybrid adaptive MCMC algorithm in function spaces**

- *Q. Zhou, Z. Hu, Z. Yao, J. Li*  
arxiv preprint [1607.01458](#)  
SIAM/ASA Journal on Uncertainty Quantification 5 (1), 621-639

## **On an adaptive preconditioned Crank–Nicolson MCMC algorithm for infinite dimensional Bayesian inference**

- *Z. Hu\*, Z. Yao\*, J. Li*  
arxiv preprint [1511.05838](#)  
Journal of Computational Physics 332, 492-503

## **A TV-Gaussian prior for infinite-dimensional Bayesian inverse problems and its**

### **numerical implementation**

**Z. Yao\***, Z. Hu\*, J. Li

arxiv preprint [1510.05239](https://arxiv.org/abs/1510.05239)

Inverse Problems 32 (7), 075006 (*Highlight Paper*)

## **Research Experiences**

---

### **University of California at Berkeley**

**CA, USA**

#### **Ph.D. Researcher at RiseLab and BDD**

*Sep. 2016–Present*

- Develop trust region based adversarial attack and propose statistical based defense method to adversarial attack
- Use ODE method to explain the behavior of residual neural network
- Used Hessian information to (i) analyze large batch training and robustness of neural networks (ii) train neural networks for large batch training (iii) determine mixed-precision and fine-tuning order for quantizing neural network
- Investigated the scaling behavior of stochastic gradient descent and K-FAC with large batch sizes for neural networks
- Proposed stochastic variants of 2nd-order methods for non-convex optimization problem and establish theories
- Applied deep learning to other fields, e.g. scientific datasets and fluid dynamics

### **Amazon AWS AI**

**CA, USA**

#### **Applied Scientist**

*May. 2019–Aug. 2019*

- Applied machine learning algorithm to explore very large scale configurations problems
- Investigated transfer learning and exploration of TVM computation configuration generation with different batch sizes and GPUs
- Investigated reinforce learning to explore fast database query answering, particularly on the Materialized View Update and Vacuum frequency.

### **Alibaba**

**Beijing, China**

#### **Researcher intern at Alimama**

*Dec. 2018–Jan. 2019*

- Investigated over-fitting of recommendation system
- Investigated large batch training of recommendation system

### **Lawrence Berkeley National Laboratory**

**CA, USA**

#### **Researcher intern at NERSC**

*May. 2018–Aug. 2018*

- Implemented CPU Parallelization of PyTorch to train large climate dataset (over 400 Gb)
- Tested robustness on models trained with scientific datasets

### **Shanghai Jiao Tong University**

**Shanghai, China**

#### **Undergraduate Researcher**

*Sep. 2014–Jun. 2016*

- Considered MCMC algorithm in infinite-dimensional space
- Designed a TG-prior with better edge-preserving property and two new adaptive algorithms

## Others

---

- **Programming Languages:** C++, Matlab, Python, Pytorch, Tensorflow
- **Conference Reviewer:** NeurIPS 2018, ICLR 2019
- **Teaching:**
  - **Stat 89A: Linear Algebra for Data Science** **UC Berkeley**  
*Graduate Student Instructor* *Spring 2018*
  - **Math 16A: Analytic Geometry and Calculus** **UC Berkeley**  
*Graduate Student Instructor* *Spring 2017 & Fall 2016*
